Team WhiteFlag reviewed by PurpleFrog

3.5 Comments

QQ Kachoo.java has nice running time comments, but descriptive method comments lacking (although noted they are in Deque.java)

3.75 Style

var names look appropriate
effective whitespace
not sure how necessary _size is

II Robustness

Some of your running times are perhaps inaccurate... consider addFirst's usage of the AL. add method.

4 Readme

very organized methods to implement! organized by retval
great explanations, specific as well
